User guide

The aim of the application is to help understand the cause-and-effect relationship by presenting simple stimuli of various modalities that are suitable for children with multiple disabilities, and early childhood children. Individuals with complex communication needs find it difficult to understand the relationship between the means and the goal that needs to be achieved. This application offers opportunities to adopt this relationship in a fun and attractive way. Items from everyday life are presented and users are encouraged to provide feedback by a sound or visual response. Creating and understanding the cause-and-effect relationship is encouraged in this way. The attractiveness of the application and the simplicity of the tasks make this application interesting for children of typical development as well.

Mode d'emploi

L'objectif de l'application est d'aider à comprendre la relation de cause à effet en présentant des stimuli simples de diverses modalités qui conviennent aux enfants souffrant de handicaps multiples et aux enfants en bas âge. Les personnes ayant des besoins de communication complexes ont du mal à comprendre la relation entre les moyens et le but à atteindre. Cette application offre des possibilités d'adopter cette relation de manière amusante et attrayante. Des éléments de la vie quotidienne sont présentés et les utilisateurs sont incités à fournir un retour sonore ou visuel. La création et la compréhension de la relation de cause à effet sont encouragées de cette manière. L'attrait de l'application et la simplicité des tâches rendent cette application également intéressante pour les enfants au développement classique.

Használati útmutató

Az alkalmazás kisgyermekek és többszörös fogyatékkal élő gyermekek számára készült azzal a céllal, hogy egyszerű ingerek bemutatásával segítse az ok-okozat közötti összefüggés megértését. Ez azért is fontos, mert a kommunikációs problémákkal küzdők számára nehézséget jelent a megvalósítandó célhoz a megfelelő a módszer vagy tevékenység megtalálása. Az alkalmazás műkás és érdekes módon támogatja az ok-okozat közötti összefüggés felismerését és megértését. A hétköznapi életből ismerős formák (járművek, gyümölcsök, gyertyák, falevelek stb.) felhasználásával motiváljuk a gyerekeket interakcióra, melyet beállítástól függően hang is kísérhet. A feladatok egyszerűsége és a vonzó felhasználói felület miatt minden kisgyerek hasznos tapasztalattal gazdagodhat.
